WELCOME MESSAGE

Seong Pil Joh
President of the Korean Society for
Aesthetic Plastic Surgery

I cordially invite all members of the Korean Society for Aesthetic Plastic Surgery, and our fellow plastic surgeons from all over the world, to participate in "Aesthetic Plastic Surgery 2016"!

The history of plastic surgery in South Korea is not long, and in the case of aesthetic plastic surgery, spans only 30 years. I am, however, confident that South Korea's aesthetic surgery has made unrivaled growths in technological development and advancement with superb surgical outcomes. I wholeheartedly appreciate and cherish the efforts of all the members that have made ongoing commitments to the field.

Our Society jointly held an academic event with the Korean Association of Plastic Surgeons six years ago, since when it has expanded to Asia and, further, the world. I must say that I find the developments of the Society more than rewarding.

Aesthetic Plastic Surgery 2016, scheduled to be held at COEX, Seoul will provide you with an opportunity for further growth and advancement by learning new surgical techniques and advanced technologies, encountering newly introduced products and machines on display, and listening to the remarkable experiences of overseas speakers.

I would like to express my deepest gratitude to the Director and executives of the Society and all the people involved for their devoted work for the preparation of Aesthetic Plastic Surgery 2016. I look forward to welcoming you in Seoul and watching you have a great time at the event as the city is blessed with increasingly warm weather in the season.

I will see you in Seoul.

Woo Seob Kim
Chairman, Board of Directors of
the Korean Society for
Aesthetic Plastic Surgery

Welcome to the dynamic city of Seoul, where Aesthetic Plastic Surgery 2016: The science of beauty is to be held. This year's meeting is designed to give board-certified plastic surgeons an even wider range of excellent opportunities for learning. In preparing this meeting, we have focused specifically on your interests; the concerns and interests of not only surgeons but also practice managers and coordinators will be thoroughly addressed..

As aesthetic surgeons, you are no doubt acutely aware of the endless unproven technologies, techniques and products that are widely marketed and confusing our patients. As members of the medical profession we must continually seek better evidence to guide how we practice. Our specified panels and presentations will challenge claims and demand proof.

This Aesthetic Meeting has been relied upon as the premier educational event in Aesthetic Surgery, and we are confident that our current platform of teaching courses, scientific sessions and discussion tables will meet or exceed your expectations.

Once again, thank you for joining us. Remember, KSAPS is your society and we exist to meet your needs and further your medical education and practice know-how.

Also, I would like to express my wholehearted gratitude to all distinguished speakers, participants, and sponsors who help to make this meeting a wonderful success.

Sang Myun Cha
President of the Korean Association of
Plastic Surgeons

Dear Members and Colleagues:

As this year°Øs president of the Korean Association of Plastic Surgeons, it is my privilege and honor to welcome you to the "Aesthetic Plastic Surgery 2016" held at the COEX, surrounded by the beautiful scenic view.

Our annual meetings are highly regarded as international gatherings that continue the tradition of highlighting major advances in aesthetic plastic surgery. And we promise another excellent educational experience complete with solid presentations, video sessions, and attendee interaction as our hosts, the Korean Society for Aesthetic Plastic Surgery (KSAPS) and the Korean Association of Plastic Surgeons (KAPS), have assembled an outstanding faculty of leading experts who are recognized worldwide as the innovators and developers of the most advanced techniques for face and body contouring.

The program is designed to stimulate debate on choices, explore controversies, and challenge established and new techniques as our ambition is to gather main actors of the plastic surgery world to facilitate the exchange of information and the confrontation of the most advanced and promising techniques for the future.

We look forward to your presence and we are confident that the "Aesthetic Plastic Surgery 2016" will be a rewarding and enriching experience both scientifically and socially.

With best Regards,
